How to change font size on quiz results?

Posted by sdford - 2018/04/01 23:46

_____

Hi,

First of all, thanks for solving my previous issue. As I sad on the other thread, the quiz is now working great, as you can see HERE.

Now I'd like to change the font size on the quiz results, but I have no idea how to do this. The element "#ariQuizContainer h2 {font-size: 31.5px;}" look a little too big. Also the text box ("#ariQuizContainer h1, #ariQuizContainer h2, #ariQuizContainer h3 {line-height: 40px;") should be resized to follow the text size, I guess. Actually, all text on the quiz results could be a bit smaller. How can I make this kind of changes in Ari Quiz?

Many thanks!

_____

Hello,

Could you provide screenshot(s) and mark elements with an appropriate font size? You can send it by email.

Regards,
ARI Soft

_____

1. Add the following CSS rules to site template CSS file:

#dtResults {font-size: 13px}
body #ariQuizContainer h2 {font-size: 20px}

2. You can read here how to modify existing translation or create a new one.

Regards,
ARI Soft
