
Changelog

Posted by jinoue - 2018/06/15 21:46

Where can I view the current changelog for ARI quiz versions? The changelog in the online documentation stops at v3.7.0.

Hello,

v. 3.9.10

- calls print dialog immediately when "Print" button is clicked

v. 3.9.8

- supports ability to change default number of items in data grid

v. 3.9.7

- change relative URLs with absolute URLs in mail templates

v. 3.9.6

- better support of Joomla! 3.7.x

v. 3.9.5

- contains fix for "Multiple Dropdown Question" question type when "0" is used as an answer.

v. 3.8.4

- supports ability to show "Try again" button at the end of a quiz.

v. 3.8.2

^ Better compatibility with site templates which use JParameter class

v. 3.8.1

^ Add compatibility "Previous quiz" parameter with Joomla! 2.5

v. 3.8.0

+ Possible to disable access to a quiz until the selected quiz is completed

v. 3.7.6

+ "ARI Quiz Anywhere" plugin was updated

v. 3.7.5

+ Add meta tags for results which shared via social networks

Regards,
ARI Soft

Hello!

v. 3.9.5

- contains fix for "Multiple Dropdown Question" question type when "0" is used as an answer.

I'm in a component made a significant amount of custom modifications, so I can't upgrade over the installed. Tell me, what files should I take from the installation package to solve the problem with Multiple Dropdown Question (0 in answer)?

Thanks.
