Do you plan on making a quiz module to show a specific quiz? If not is a custom solution available?

Hello,

Do you want to embed a quiz into an article or other content? If yes, it is possible with "ARI Quiz Anywhere" plugin which is included into "ARI Quiz" package.

Ideally I wanted to put a quiz in a custom module location (see attached)
I use jbusiness listing extension and would like to add "quizzes" to specific business listings

"ARI Quiz Anywhere" plugin can load the particular quiz in any content even in module positions. If you want to show quizzes list, "Components Anywhere" 3rd party extension can be used. It loads components in any content.
