
Score values

Posted by kitapokuyorum - 2010/08/16 18:29

While creating quizzes I forgot to enter score value to each question of quizzes now I have lots of quizzes with no score value for the questions. Is there any quick way to correct my mistake or Do I have to open every single question to enter the score value?

Hello,

You can use 'Bulk Edit' button on questions page for setting questions score. For this open questions page, select necessary questions in questions data grid , click 'Bulk Edit' button, type score in 'Score' textbox and click 'Apply' button.

Regards,
