Thank you very much for your help! I tested it and there is some trouble with fonts, look at screenshots. At first - there is some squares and secondly - certificate look is not good, because font is not presentable. Can I change type of font of certificate? so that the certificate looks the same as on the site http://www.ari-soft.com/images/fbfiles/images/2018_09_22_2_58_15.png

Hi. I have the same problem. Can you help me remove question marks from the certificate? And explain how to apply text to an image to get a corporate certificate?

Hello. I don't have an order number. It's lite version (Quize Lite). Downloaded from here http://www.ari-soft.com/Joomla-Components/ARI-Quiz-Lite/Detailed-product-flyer.html?_2020040523
