_____

Hello,
I would like to view quiz results in a tablular format.
A table with user as rows, and answers to questions as columns would be ideal.
Does anyone know how to do this?

Alternatively, in which table does ari quiz store the quiz results?

Thanks

_____

Currently results are presented as table with information about user, quiz, score, time, etc. There is a possibility to view detailed results.

Tables where results are stored:
_ariquizstatistics
_ariquizstatisticsinfo

question details
_ariquizquestion
_ariquizquestionversion

where is your Joomla! prefix for tables.

Regards,
ARI Soft
