
I would like to have the e-mail adress of the user

Posted by Brandewiede - 2018/12/19 11:35

I want the user to enter his e-mail address before he gets the result. How does it work?

Thanks.

Hello,

The extension can collect name and email for guest users on quiz description (start) page. For this open "Access & Security" tab on quiz settings page and select "No" or "By user's wish" value in "Anonymous access" drop-down.

Regards,
ARI Soft
