## How to recover the mistakenly deleted Quiz ID

Posted by sardhar - 2010/08/19 23:39

---

Thanks for providing such a great component that matches 95% to my requirements.

I had mistakenly deleted the quiz id number 1, and thus the new quiz is starting from quiz id 2 (as default)

I am using sh404SEF plugin. Currently the URL is similar to the following:

<http://www.mywebsite.com/IQ/Quiz-2>

Please help me, how can i change or recover the deleted quiz id, so that my quiz numbers displayed to the users & the quizzes are same. If there is any option to show URL, only the QUIZ NAME (not the quiz id) is also fine.

Hello,

It's impossible to restore deleted quizzes because the component deletes all database records related to deleted quizzes. We can provide updated version of 'ARI Quiz 404SEF' plugin which will create link without quizzes ID.

Regards,  
ARI Soft

While i communicated with our procurement department & waiting for order number and license key, i have created a new quiz id & edited to the deleted number at database through phpmyadmin. Thus my problem is solved. :laugh:

Thank you very much for your fantastic support.
