
Export unique quiz id with excel

Posted by varta - 2019/02/11 15:45

Hi guys, it's possible to export "TicketID" with the "quiz results"?

I need the unique test id for each row of result because i save it inside an external table when quiz is terminated and need to compare it.

Eventually, it's also possible to rewrite the "Login" columns (always Guest) in quizzes results with the unique quiz id?

Thank you and best regards!

Enzo
