
Migration from joomla 1.5 to Joomla 3.9

Posted by sorozco - 2019/03/23 22:37

Hi, iÂ´m migrating a site from Ariquiz 2 on Joomla 1.5 to Ariquiz 3.9 on Joomla 3.9

I have several problem. I have to change manually the database because the component donÂ´t update the base.

Now i have all in Joomla 3.9 the quiz, result pool and everything working but some quiz say "the selected quiz is not available, contact with administrator" This is solved deleting some quiz from aristicsinfo database table. Not is in all quiz.

The other problem that i have is: I start the quiz when i answer the last question the quiz start again and donÂ´t show he result.

How can i fix this?

Regards.

Hello,

Could you provide a link to a quiz which causes the problem?

Regards,

ARI Soft
