
Ari Quiz and Quizzes results print.

Posted by rvoyum - 2019/05/09 22:45

When a user has answered a Quiz the questions, the user's answer and which option that is correct are displayed. When the user prints the result, the user's response and the correct option for the question disappeared.

The same happens in the administration module under "Quizzes Result"

Since I need to document the result to the Government on paper, I have a problem. The quiz must be printed with the user's answer and the correct alternative from the administration module.

My question is how can this be solved?

Hello,

Do you the latest version of the extension (3.9.19)? It is available in "Member Area" on our site.

Regards,
ARI Soft

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

The problem occurs because default Joomla! template for admin part is override print styles. It contains the following CSS rule:

```
@media print
* { background: transparent !important; }
```

This problem can be fixed if modify /administrator/components/com_ariquiz/assets/css/styles.css file. Replace the following code:

```
.aq-quiz-result #dtQuestions .icon-ban-circle {
background: transparent url(../../../../../components/com_ariquiz/assets/images/publish_x.png) center center no-repeat;
}
```

```
.aq-quiz-result #dtQuestions .icon-ok {
background: transparent url(../../../../../components/com_ariquiz/assets/images/tick.png) center center no-repeat
!important;
}
```

with the following one:

```
.aq-quiz-result #dtQuestions .icon-ban-circle {
background: transparent url(../../../../../components/com_ariquiz/assets/images/publish_x.png) center center no-repeat
!important;
}
```

```
.aq-quiz-result #dtQuestions .icon-ok {
background: transparent url(../../../../../components/com_ariquiz/assets/images/tick.png) center center no-repeat
!important;
}
```
