
Test in article

Posted by andrej - 2019/05/14 11:40

Hello.

Sometimes it happens, that the test in the article opens like in the annex - you can see only one question. Refreshing the page also does not always help. What to do?

Best regards

Hello.

Something is wrong. I installed ARI Quiz Anywhere and this extends the page (jumps) far beyond the framework - see the attachment. Nothing was possible in the settings

Best regards
