
Remaining time mismatch in questions of a Quiz

Posted by conduiraonline - 2019/08/05 12:36

Dear Team,

When I have set up a quiz, I have given 150 seconds for Quiz time and 30 seconds each for questions in 5 questions quiz.

The first question shows right - Question time (30 seconds), Quiz time (2:30 mins) in count down
The second question shows wrong - Question time (30 seconds), Quiz time (14:27 mins) in count down

There is an inconsistency in the time being shown. Please help!

You can check it here

Can we get an update on this?

Here is the link to the quiz

Hello team,

Please help us with this issue. We are running quizzes and this is really creating huge problem for us.
