
Random questions

Posted by Paulob - 2019/11/21 15:02

Hi,

In order for the student to answer questions at random, I must first create a category, then create a database of questions in that category. Then how do I configure it so that every time the exercise is performed the quiz randomly picks the questions in the question bank?

Thanks,

Paulo B

Hello,

It is possible to set "Random questions" parameter to "Yes" in quiz settings if questions assigned to quiz directly and not selected dynamically from question bank.

Regards,
ARI Soft
