# Request for Info-Text, \"No Answer\" as Questiontype

Posted by peterrothe - 2019/11/22 17:06

_____

I'm planning to build a Quiz, where sometimes is just Text and the user just can press forward. For exampel to explaine something, and then ask in the next step with a question several things about it...

So my question is, if it is possible to add the Questiontype: "No Answer"

I think, it would also improve the learning-paths with this option

_____

Hello,

It seems "Essay" question type is suitable for your needs.

Regards,
ARI Soft

_____

Hello,

Thank you for the fast response.
I tried this question-type - but it expects a answer from the user. when nothing is filled in, it even ask the user.

I was looking for a Qustion-Typ with no answer at all
