
Newbie question re heirarchy

Posted by littleanelie - 2019/12/14 02:21

Sorry but new to this quiz. I have an old out of date quiz that I am trying to replicate. There are 2 quizzes with separate questions.

So should Quiz Category A have the parent Quiz 1.?

Then Quiz 2. has quiz category B is this correct? "No parent" is showing.

I need to kick off the hierarchy.

Or is Quizzes not related to the categories at all?

Thank you

Also I have questions with four answers but they are not "correct" answers They are like which do you prefer or what situation were you in so they can only pick one.

Can I do anything else other than percentage?

Thank you

Hello,

A quiz can be assigned to a quiz category. Quiz categories have a tree structure (can have sub-categories).

Do you want to grant an access to quiz 2 only if quiz 1 is completed or what your case?

The extension doesn't support personality tests.

Regards,

ARI Soft

Thank you for your reply.

Most of the questions will have a correct answer but some do not and are more a choice.

Quiz 1 and Quiz 2 are seperate.

If what I need is not available can I get a refund? I have bought it two days ago. Thank you
