
Particular question template?

Posted by RobertG - 2020/04/20 06:42

Hi,

Is it a way to display a question with the answer textarea inside the question?

For example: "There is a lot of _____ in the library" and either let to choose between responses or manually add response (not the same question type: one with choice, the other with free text).

Thanks for you help!

Robert

Hello,

These question types are supported by "ARI Quiz" PRO. You can play with it on demo site.

Thanks for your reply.

I previously tried the pro demo but I didn't find how to do (insert the response into a phrase, not at the end).

Don't worry, I'll find ;)

Regards

Robert

Hi,

Another question: I don't find how to set local time. Some minutes ago, I completed a test quizz and got "2020-04-27 04:03:27" (UTC - 2 but I'm in UTC + 2 so it would be 2020-04-27 08:03:27).

Hello,

The extension uses timezone which is selected in Joomla! configuration.

Thanks for your reply, but timezone is set to "Paris", so actually UTC + 2

I just made a new test and have 7 h instead of 11 h
If I change timezone to UTC, the hour is right, 9 h UTC
