## MailChimp Integraion Not workin with OptimizePress

Posted by MaximillianM - 2020/05/20 23:18

---

Hi,

It looks like ARI Quiz calls the same variable name for email integration as my OptimizePress theme does. So the quiz runs and I can enter email information and then see the results, but MailChimp never receives the data. When I turned on logging I receive this error.

PHP Fatal error: Cannot redeclare Clue\StreamFilter\register() (previously declared in /home/maxriggs/public\_html/wp-content/plugins/op-dashboard/vendor/clue/stream-filter/src/functions.php:140) in /home/maxriggs/public\_html/wp-content/plugins/ari-stream-quiz/libraries/vendor/vendor/clue/stream-filter/src/functions.php on line 127

I've tried it using Mailerlite with the same error. Any thoughts on how to fix this? Or a temp workaround?

Thanks  
Max
