# Multi-categories for quiz
Posted by stepan39 - 2020/09/13 08:34
_____

Hello!
It is necessary for quizzes to be displayed in different categories at the same time. The quiz settings should have multiple choice categories.
Tell me how to change the program code for this?

Hello,

Relations between quiz and category are stored in #__ariquizquizcategory service, but it also require to update all places where quiz category is used (when check access permissions, show quizzes per category and etc.).

Regards,
ARI Soft
