Frame width

Posted by Taimo82 - 2020/11/11 22:20

_____

Hey,

I have the problem, that Safari isn't showing the Quiz properly (on Desktop PC). Same with any browsers using mobile devices.
The "Loading" text won't disappear and the frame itself (using Ari Anywhere within an Article in Joomla) isn't using the 100% width.

Using Firefox on Desktop PC everything works properly. I actually didn't change anything in the theme css code...

How can I fix this?

_____

Hello,

Could you provide a link to a page where the problem occurs? It looks like a conflict with a 3rd party extension.

Regards,
ARI Soft
