
Assign quiz to another template

Posted by LoungePound - 2021/03/03 08:24

Hello Ari team!

I'm having issues with compatibility of new beta yootheme template and Ari quiz. When I click on "start test" button nothing happens, the test doesn't start.

I am not asking you to fix that as it's not your issue and yootheme should fix that as other templates work fine (it's beta anyway).

Please give me a tip how I can assign Ari quiz component to another template. So that the new template was assigned to component/ariquiz/Quiz/...

Hello,

Joomla! supports ability to set particular template for selected menu items. Open "Extensions -> Templates -> Styles" page then select the desired template and navigate to "Menu assignments" tab.

Regards,
ARI Soft
