
migration ari quiz to a new joomla site

Posted by franek - 2021/05/31 22:14

Hi,

I want to migrate my ari quiz from current joomla 3 site to a new joomla 3 website.

Is there any documentation available for the process? For example which tables I need in order to keep all the data.

Thanks

=====

Hello,

It should be enough to copy all DB tables with prefix #__ariquiz and then install "ARI Quiz" on a new site.

Regards,
ARI Soft
