Hello,

Thanks for your great quiz plugin so far. The only but very important issue is, that the email integration with MailChimp double opt in do NOT work.

What i have to do, that it works? In the PRO version its possible to collect emails with MailChimp double opt in?

Thanks,
mik

Hello,

The plugin supports double opt-in for MailChimp integration. Open "ARI Stream Quiz -> Settings -> General" page and enable "Double opt-in" checkbox in "The parameters are used for integration with MailChimp service" parameters section.

In Settings >> General there is only the option for put the MailChimp API but i can't find any checkbox for enable double opt in.

This option exists only in the pro version of the plugin?

Ok,

With which PLAN the email integration with MailChimp works well?

Personal? o Developer?

The Paysite looks a bit old. For the PRO Version i have to pay one time or annual or for month?

Thanks,

It is supported by Personal and Developer plans. The only difference between the plans is number of sites where the plugin can be installed. It is one site for personal plan and any number of sites for developer plan.

We offer a lifetime subscriptions for all our extensions. It means you pay only once.

Hello, i be the same user (mik01) although with another user name now because today i bought the Pro Version of the plugin. So i have registered with the new name survival1 when i payed the plugin on your page.

Now i installed the pro version but still i can't see any option for activation the double opt in for Mailchimp. I can't collect emails. But for this reason i bought the Pro Version.

Thanks for help,

Ok, i'll answer myself always. Not problem :)

I have 2 Quiz now running on my page with your great plugin and it works very fine.

Just want to say thanks for your very great Quiz plugin. Before i found your plugin i searched and testet a lot.

The ARI Quiz Plugin is the very best Quiz Plugin ever!

Keep on your great work!

Thanks and regards,
