Hello,

Do you use the latest version of the extension which is available in "Member Area" on our site?

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

I just purchased AriQuiz and getting 500 server error when trying to install.

When I try to install AriQuizLite I get a different error-

"An error has occurred.

0 Non-static method AriKernel::init() cannot be called statically"

???
