
Quiz results email

Posted by Kim Tabori - 2021/07/02 13:52

When I allocate a quiz the recipient receives an email advise of the results thereafter.

I have not changed my systems so that the recipient clicks a link and enters their email and name to start the quiz (not allocated a quiz like previously but) however they don't seem to receive the results email. (the results setting are the same as previously but not sending).

Please could you assist.

Hello,

Could you provide a link to a quiz where the problem occurs and a temporary access to J! backend by email?

Regards,
ARI Soft
