
Can users create their own tests and share it

Posted by alvarohojas - 2008/12/22 21:24

Hi,

I am thinking in implement in my web site a option that allow teachers to create their own tests and then share it with their students, so them should do it online.(everything in the front end)

Is it posible with this module?

Regards

Hello,

It's not possible to create quizzes on front-end. We are thinking about adding such feature in one of future releases.

If you need this feature soon please contact us by email and we can discuss custom development.

Hi,

When this release will be able?

Regards

It's not decided finally yet, most probably in couple of months.
