Error 500 - Installing AriQuiz

Posted by thank_you_ari - 2021/07/13 23:00

_____

I just purchased AriQuiz and getting 500 server error when trying to install.

When I try to install AriQuizLite I get a different error-

"An error has occurred.
0 Non-static method AriKernel::init() cannot be called statically"

???

I tried it on an absolutely fresh install of Joomla and I still get errors for both. Please advise ASAP. Thanks.

FYI. I was running PHP 8 and I guess this was causing issues. Installs fine on PHP 7.4.

Hello,

Sorry for the delay. Currently the extension is not compatible with PHP 8.x.

Regards,
ARI Soft

Is there a timeline to making it compatible with PHP 8?
