
Community Builder CB Substitutions Text Templates

Posted by thank_you_ari - 2021/07/15 21:50

Can I instert CB Substitutions inside a text template (to use for success/failure etc.)?

Community builder has a Content Bot plugin that allows me to insert CB Profile field values into any native Joomla article.

I tried inserting the substitution code into a an AriQuiz text template but it did not process it.

Should this work?

Thanks.
