Personality quiz!!! omg
Posted by Lemonbear - 2010/09/02 22:09

_____

How can i make a personality quiz with a number of different descriptions according to the questions answered by the user. For example:

For 5 given questions..
If users A and B answer the questions differently I want them to get a different description result.

Please explain more thoroughly with an example if possible

PEace out broskis

:)))))))))

_____

Hello,

The component can display different text on quiz final page based on score range. For example if can display one quiz text if a user earns 0 or 20% and another if earns 21%- 50%.

Regards,
ARI Soft
