
how to have multiple column in a question

Posted by Claude_Troncy - 2010/09/03 10:19

Bonjour,

I would like to have more than one column in a question (Single, multiple ...) I think it is possible modifyng css, but I cannot find where.

Merci
regards
Claude

Hello,

Sorry, but currently the component doesn't provide ability to extend input box for answers. We'll implement this ability in a future release.

Regards,
ARI Soft
