
ARI Quiz 3.9.21 | Joomla 3.10.8 | PHP8-Not working

Posted by sarcas28 - 2022/07/03 08:54

Hi,

My server only work about the PHP8 version. I have ARI Quiz 3.9.21 with a Joomla 3.10.8 but the frontend return a HTTP500 Server Error. If i disable the Component all work good but i need to use ARI Quiz.

Any possibility to update ARI Quiz to work with a PHP8 Version?

Thank you!

Hello,

Sorry, but v. 3.x doesn't support PHP 8.

Regards,
ARI Soft

I have to move to PHP8.1 but than I get a white screen. So I went back to PHP7.4. Can you tell when Ari Quiz will be updated for PHP8.1 and/or for joomla4. I also want to pay for the update. I have many quizzes and want to keep them.

Sorry, PHP 8.x support will not be available for "ARI Quiz" v. 3.x.

Regards,
ARI Soft
