
Importing Questions & Help Documentation

Posted by ratsima - 2010/09/04 10:07

Hi there, I'm evaluating ARI Quiz before purchase and would appreciate your comments.

a) importing questions via a CSV file is important to me and I have looked at the template sample you kindly provided in this thread. However, it would be better I think if you could also provide a template sample with data, which is linked to a real quiz on the website so users could see exactly what was happening? If you already have this, great, please point me to it.

b) I realise that there is user support documentation contained within the component but is it possible to review that documentation prior to purchase?

Your component seems an excellent tool and I plan to buy it if I can get my last few issues resolved. You must be congratulated on your quick forum responses to questions and my only annoyance so far is that it seems quite tough to find detailed information about the Ari Quiz product, other than to go through the forum.

Thanks in advance.

Hello,

Thank you for your interest in our component. Regarding your questions:

1. Find in attach CSV with questions from our demo site.
2. Documentation can be downloaded from ARI Quiz page. Download link is located at the bottom of the page.
