Upgrade to PHP 8.0 ends in white screen
Posted by rherder - 2022/09/12 08:18
_____

Hi,

I have noticed that my upgrade from php 7.4 to 8.0 ends in a white screen with Joomla 3.10.11.
It is ARI Quiz that causes this.

Is there any way to resolve this, is there an upgrade of ARI Quiz to be aspected?

Thanks.

Gr.Rein

Hello,

Sorry, but currently the extension doesn't support PHP 8.x.

Regards,
ARI Soft

_____

Only for "ARI Quiz" v. 4.x.

Regards,
ARI Soft

_____

"ARI Quiz" v. 3.10.0 is compatible with J! 4.x and PHP 8.x.

_____

Install on Joomla 3.10
PHP 7.4:
Call to a member function getCategory() on bool

PHP 8.0:
Undefined constant "ARI_INSTALL_ERROR_UTF8"

===

_____

Try v. 3.10.1 please. It should avoid "ARI_INSTALL_ERROR_UTF8" problem.

We can't reproduce the problem for J! 3.10 and PHP 7.4. Does it occur on fresh Joomla! installation?

Regards,
ARI Soft
