Hello

Please try the below two links, all the exams are having the same issue

https://ecampus.shippingcollege.com/index.php?option=com_ariquiz&view=quiz&quizId=176

https://ecampus.shippingcollege.com/index.php?option=com_ariquiz&view=quiz&quizId=204

We can start the quiz without problem:

Could you specify if any specific steps are required to reproduce the issue.

It is just warnings, not errors and they are not affected on functionality. BTW, the extension doesn't support Joomla! 4.x.

The extension is not ready for J! 4.0. If you strongly need install J! 4.0 then currently only possible solution to use another extension which is compatible with J! 4.0.

so basically I have to find another provider?

or create a new website? using wordpress?

If I create a new website can I carry across my purchase to that platform as you no longer offer it on Joomla?

We have "ARI Stream Quiz" plugin for WordPress and currently it can help trivia quizzes and personality tests. This plugin is not the same as "ARI Quiz" for Joomla! "ARI Quiz" for Joomla! 4.x will not be available in next coming months.

Please advise when/if it is going to be launched as I need to decide if I am going to have to find another option or not and don't want to leave it to the last moment.

I have seen comments previously that say "Currently we are not working on Joomla! 4.x support. We are working on new version of quiz plugin for WordPress. After this we will create a new version for Joomla!" and dated one year and six month ago...

It is important to let your clients know as there business (ie livelihood) depends on the upgrade.

You leave a large group of people with no way out. I was hoping you'd update the Quiz too. After all, this module cost quite a bit...

Hi there,

Sorry we can meet your needs. Unfortunately each major Joomla! version doesn't provide backward compatibility so it needs to rewrite the whole extension. Currently we are focused on creating new quiz plugin for WordPress after this we'll re-use it to create quiz component for Joomla! 4 with less dependences Joomla! framework.

If you want to move to Joomla! 4 soon then you can migrate to another a quiz extension with Joomla! 4.x.

Will it going to be possible to update the Joomla 3 AriQuiz to the new Joomla 4 Ari Quiz version?
Or is the new Joomla 4 Ari Quiz version completely different and is update not possible?

Regards
