
ari quiz results template not showing results

Posted by eyetec - 2023/10/06 15:09

Ari quiz results template is not showing correct quiz results

Template shows 0 score and not passed when score was 100% and passed.

Results are correct on the results page for the user.

Using Joomla4 with PHP 8.

Hello,

It seems no score specified in question. Review questions please and check "Score" parameter. Is it greater than 0?

Regards,

ARI Soft

That was the problem. No score entered for the questions.

Thanks so much for your help.
