
field penalty error

Posted by infermieriattivi - 2023/10/21 07:53

Thanks for updating ARI Quiz

When I insert a quiz if I remove the zero and leave the field empty in penalty, when I save from error.

Text is:

500 AriQuizModelQuizquestion::saveQuestion() :

The following SQL query can not be executed ' INSERT INTO `#__ariquizquestionversion`
(`QuestionId`,`QuestionCategoryId`,`QuestionTypeId`,`Question`,`QuestionTime`,`HashCode`,`Created`,`CreatedBy`,`Data`,`Score`,`Penalty`,`BankQuestionId`,`Note`,`OnlyCorrectAnswer`,`HasFiles`,`AttemptCount`) VALUES ('1619','0','1',

Il midollo rosso:'0','2023-10-21 06:30:00','42','\nproduce cellule ematichecorrisponde a un accumulo di grassoÃ”
costituito da tessuto osseo compattoforma nuovo tessuto osseo in caso di frattureÃ” costituito da tessuto
nervoso\n','1','0','0','0','0')'. Details:

obviously I know and I don't leave the field blank.

Hello,

Update the component to v. 3.10.12 please. It contains the fix.

Regards,
ARI Soft

You are fantastic
I have already installed the update.
Everything OK
