## Each answer has a different score value and all ar

Posted by jamijares - 2010/09/13 05:09

---

I am thinking of a quiz in which each possible answer option has a different value and all can be summed at the end.

Example:

Question 1

answer a is 5 points answer b is 10 points answer c is 15 points

Respondent chooses b

Question 2

answer a is 10 points anser b is 20 points and answer c is 25 points respondent chooses C

after completing answers results are added  $b=5+c=25$  plus others

is this possible?

Second question

Can I get a temporary localserver test license for testing and showing to customer a proof concept?

thank you

Hello,

1. 'Multiple Summing' question type can be used for this purpose.

2. Sure, only provide your order number and domain for what you need additional license by email.

Regards,

ARI Soft

Hi again

I made a serach on your forum for Multiple summing and based on your descriptions it seems that it fits our needs but we would like to test.

then regarding your answer to question 2, I meant test before purchase not after. Could you provide a test version for a localhost test?

OK thank you also for this last reply

I will think about and decide in a few days

Hi

I just received the proposed layout for the quiz done by the designer and I want to check with you if there is anything wrong or difficult to achieve with CSS styling in Ari Quiz.  
The header and right panel would be done within Joomla! Resources, "outside" the Ari Quiz module, only the contents including and below the "1. Libertad de pensamiento y opinión" subheader will be managed within the Ari Quiz contents. Any suggestions are welcomed.  
Best regards <http://www.ari-soft.com/images/fbfiles/images/ProposedQuizLayout2.png>

Are header and right panel modules or you want to embed quizzes into Joomla! Resources page?

Regards,  
ARI Soft

---

Right panel and header can be made with html modules

Quiz contents would be in the contents panel

We can create new page for 'ARI Quiz' which will display quizzes in way what you need.

Thank you very much  
I will be in touch in a few days after I get the project approved by the client.  
talk to you soon
