Hey guys, 1. I have an error on the bottom of each Question I get: "Question #{qIndex} of #{qCount}". So it doesn't actually show the question number and the question count. Any ideas? (See attached image) http://www.ari-soft.com/images/fbfiles/images/test.jpg 2. Is there any chance to switch the position of the two buttons "Save & Exit" and "Save". (Because for me its normal thave the "continue to next part"-Button on the right hand side) 3. Are you guys interested in a correct German frontent translation? (The old one was terrible)	De questions by m_e - 2010/09/16 12:01
the question number and the question count. Any ideas? (See attached image) http://www.ari-soft.com/images/fbfiles/images/test.jpg 2. Are you guys interested in a correct German frontent translation? (The old one was terrible)	juys,
2. Is there any chance to switch the position of the two buttons "Save & Exit" and "Save". (Because for me its normal thave the "continue to next part"-Button on the right hand side) 3. Are you guys interested in a correct German frontent translation? (The old one was terrible) Re:Three questions Posted by admin - 2010/09/16 12:13 Hello, 1. Open 'Components -> ARI Quiz -> Languages Frontend' page on the component backend and choose active language for editing and use 'Frage #{qlndex} aus #{qCount}' instead of 'Frage # {qlndex} aus # {qCount}' message. 2. Yes, you can edit the next template file: /components/com_ariquiz/view/question.html.php or we can provide updated template for you. 3. We don't speak German, but the current German translation was provided by the customer from Germany. If it contains mistakes we would be happy to use corrected version. Regards, ARI Soft
