
Question Bank Sub-Categories

Posted by Alanus - 2010/09/20 23:09

Hi, is it possible to arrange Qs in the bank under categories and sub-categories? For example, I want banks of questions about meals, some Qs are about meals in general, some are specific to individual meals eg breakfast.

I want to set up several different quizzes that can take meal-specific questions and/or general questions within the same quiz.

Seems to me that sub-categories would be the best way to organise Qs of which I will have hundreds! But maybe I've missed something, so please help.

Thanks you.

Hello,

Currently the component doesn't provide ability to create sub-categories.

Regards,
ARI Soft
