## Gallery of Quizzes?

Hi, is there a list of URLs showing quizzes made by AriQuiz? As a newbie, I'd like to see what others have achieved, content, style, layout etc. Can you provide a few links?

Any users out there who would like to share their quiz URLs?

Many thanks

Hello,

Currently we don't have a list of links to sites where the component is used. This is private information of our customers, but it's good idea provide possibility for customers share link to their site.
