## You can not take the quiz because it does not cont

Posted by slancaster - 2010/09/22 14:43

---

I have installed and configured Ari Quiz on my site - and set up a test quiz (currently only has 2 questions) however when I try to take the test in the front end of the site I get the error message

"You can not take the quiz because it does not contain questions"

I can't get the help documentation download to work either so I'm stuck!!!

any help would be gratefully appreciated

Hello,

Have you created questions in a test quiz or in question bank? Open 'Quizzes' page and click 'View' link in 'Questions' column from quizzes data grid that add questions to a quiz. If test quiz contains questions could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,  
ARI Soft

that sorted it - I had the questions in the question bank but hadn't imported them!!

thank you :)
