duplicating database

Posted by madmmonkey - 2010/09/27 01:37

_____

I have a question like this:

As the TOEFL test, it has the long reading comprehension paragraph and has more than a question to answer for one paragraph. if I use ARI Quiz I have to add each question with the same long paragraph, it will make the database bigger with the duplicated paragraph. How can I do this without duplicating database, it means I add one and can use more whenever I need it.

Please visit

http://www.englishteststore.net/index.php?option=com_content&view=category&layout=blog&id=75&Itemid=291 to see some Reading Comprehension Test

Thanks

_____

Hello,

Do you need the same paragraph for the whole quiz? If yes, we can add new property to quiz settings where this paragraph can be specified.

Regards,
ARI Soft

_____

How can we do this? could you please show me step by step to do that. However, as you mentioned this setting apply for the whole quiz. if we have a quiz has 20 questions and 2 paragraphs, 10 first questions use for the first paragraph and the last 10 other for the second, can ari-quiz support this?

Thanks

_____

In this case we can add this property to quiz category settings. Now this isn't available we mean that we can implement this.

Regards,
ARI Soft
