Quiz Statistics by Question Category

Posted by svetlana13 - 2009/01/12 04:34

_____

Hello,

The default quiz statistics is currently cumulative for all categories together:

Quiz Result
Result : 40 / 45

I couldn't find how to make the quiz statistics grouped by Question Category, so that the user can see which topics are their strengths/weaknesses, for example:

Total CFA Sample Test Result 35/45

Ethics 4/5
Quantitative Methods 2/5
Economics 0/5
Fixed Income 5/5
etc...

The purpose of the quiz is for user to determine in which topics they score better, without being able to tell during the exam which questions are from which topic (i.e. they are randomly ordered in the quiz).

Thank you in advance.
Svetlana

_____

Currently there is no such functionality. There two options:

1. You can submit feature request and we will think about adding this in future releases.

2. You can order custom development and we will implement this for you. In this case we will need your exact requirements.

Regards,
ARI Soft
