Question Fonts

Posted by bijumk - 2010/10/26 16:32

_____

Hello

I started using the software and found it is good... I just want to know whether I can change the font or colour of the font of Questions/ Answers in Quiz ? Because in the default setup there is no visual distinction between them...

This makes confusion especially when I am viewing the result

Is there any way to change the font/ color of the question ??

_____

Hello,

The following CSS rule can be used that change font and color of questions text:

```
#ariQueMainContainer
{
  color: green;
  font-family: Tahoma;
  font-size: 20px;
  font-weight: bold;
}
```

Regards,
ARI Soft

_____

Hello

I added the following to the last of default.css

```
#ariQueMainContainer
{
  color: green;
  font-family: Tahoma;
  font-size: 20px;
  font-weight: bold;
}
```

But nothing happens... The question text is still like the old one

_____

Could you provide link to page where we can see this problem because it works on our test server?

Regards,
ARI Soft

_____

Hello

You can see the quiz at

http://exams.educationobserver.com/index.php/ARIQuiz.html?task=quiz&quizId=1

The problem now is, it changes the question fonts occasionally for some questions... and for some questions it uses two different font sizes for the same question
