
Licence key

Posted by Fetchiz - 2009/01/15 14:46

Hello,

I've purchased ARI Quiz few days ago. I would like to install it on localhost for now but I wrote down the precise url (i've added the subdomain). So it's not working but this is not the purpose of the thread.

When will i get the full licence ?

In advance thank you

Sincerely

=====

Hello,

You have generated the license for domain <http://127.0.0.1/v4/>. This is not correct, please be careful generating licenses and read warnings and information messages. We have deleted incorrect license key. Please go to member area and generate new license key for domain localhost.

You will get full license key when your payment is verified in a few days.

Regards,
ARI Soft
