
Not show results for Failed Quiz

Posted by medicdoc - 2009/01/15 20:03

I have a customer that does not want his people to get the answers if they fail the quiz is there a way to not show the questions and answers if they fail the test? Sorry if this has already been answered but I couldn't find it.

Thanks

Jason

Currently it's possible to turn on/turn off full statistics view (that can be shown after completion of quiz) - but it's not possible to do this depending on quiz results.

There are two options:

1. You can submit feature request and we will think about adding this in future.
2. Contact us regarding custom development.

Regards,
ARI Soft
