
a little question about Ari quiz

Posted by dreamtime - 2010/11/22 15:50

hello please

I've installed ARI Quiz Lite and everything was ok, it works like a charm.

my client told me to translate the bottom line in the quiz page "developed by" into my language, italian or remove it. Have you any suggestion please? I looked for this sentence in the backend part where I translated everything but I could'n find this sentence.

Thank you so much for your assistance,

=====
