## Where are the hotspot question images stored ?

Posted by Forex\_Master - 2009/01/20 10:36

---

Hi there,

I stored a few images for testing purpose and I want now to simply delete them. Can't find out in which folder they are supposed to be.

Can anyone point me out the path ?

regards,

=====

Images for hotspot questions are kept in database(table #\_\_ariquizfile where Group='hotspot') and have cached image on disk(/administrator/components/com\_ariquiz/cache/files/hotspot). We are working on file manager for hotspot image.
