Loading translation

_____

I have traslated all the quizes in our site to spanish

the only word I am missing is the Loading text when the quizz is loading.

Where do I translate Loading?

Thank you for the reply

Re:Loading translation

_____

Hello,

Open "Components -> ARI Quiz -> Languages Frontend" section on the component backend, click by necessary language name, open "AJAX" tab and edit "Loading message" label.

Regards,
ARI Soft

Re:Loading translation

_____

Is some cache affecting somehow the results?, as I have done what you suggested and it does not change.
I am enclosing two images, the first of the admin backend with the translation done and the second of the front end where it does show it hasnÒ't changed.

In case you want to take a look the foont is:
http://planificanet.gob.mx.temp.realssl.com/index.php?option=com_content&view=article&id=18&Itemid=20

and the backend is:
http://planificanet.gob.mx.temp.realssl.com/administrator/index2.php?option=com_ariquiz&hidemainmenu=1&task=flang_add&fileId=16

the admin login is
***

Re:Loading translation

_____

You use "ARI Quiz in Content" plugin and this loading message is defined in plugin settings. Open "Extensions -> Plugin Manager -> System - ARI Quiz in Content" page on Joomla! backend that change this message.

Regards,
ARI Soft
