
Source Type - Articles: Not Saving

Posted by JBrondos - 2012/06/29 14:12

1) I've gotten the module to display and animate on the page, but I haven't been successful at getting articles/content to show.

2) I have tried editing the features in the Basic -> Source Type box, such as

- changing the article count from 10 to 3
- switching "Ignore Frontend articles" from "yes" to "no"
- selecting categories (news)
- adding {\$title} to Template

But whenever I hit Save and Close and then come back to the settings page, I note that all of the changes I have made reverted to the default settings. I wonder if this explains my point #1.

What am I missing? (I am using Firefox browser and Joomla! 2.5)

Thanks.

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled.

Regards,
ARI Soft

I apologize for being ignorant :S , but is the "System - ARI Extensions" plugin a separate file -- or did it come in the .zip with the module? If it is a separate file, from where do I download it? Thanks for your patience and assistance.

Download aripaginator_unzip_first.zip archive in "Member Area" on our site, unzip and read readme.txt file. It contains instructions how to install the extension.
